Note to the Reader regarding Benchmarks: This performance sheet uses a benchmark, the S&P/TSX Composite Total Return Index, as a comparison to the fund. There are certain differences between the index and the fund's investment strategy that investors and potential investors should understand in order for the comparison to be meaningful.

The primary investment strategy employed by the Fund is to apply qualitative, quantitative and comparative research to manage a portfolio of selected high growth securities. The Fund may take both long and short positions and will aim to produce returns above the S&P/TSX Toronto Stock Market Index by investing into companies with an attractive growth profile. The Fund may choose to deviate from its investment objective by temporarily investing most or all of its assets in cash or fixed income securities during periods of market downturn or for other reasons. As a result, the composition of the fund may be significantly different from the index. The Fund is different from the index in other ways. An index, in general, is a passive basket of securities, while the Fund is actively managed. The Fund incurs expenses (including commissions, operating expenses, and taxes) which are deducted from the assets of the Fund (however, the returns presented on this performance sheet are net of expenses). An index has no such expenses. For more information, please contact your advisor.
